

Invasive Plants of Humboldt and Del Norte County

Photos taken April 22, 2020

By Laura Julian

A photograph of Shining Geranium (Geranium lucidum) plants. The plants are growing in a white plastic bag. They have green, lobed leaves and bright pink flowers. Some stems are reddish. The plants are growing in a white plastic bag, which is placed on a dark, textured surface. The bag is partially open, and the plants are visible through the opening. The lighting is natural, and the colors are vibrant.
